Shift is Happening: Riding the Wave of Change. As our world experiences and moves through a major shift in consciousness, how do we stay oriented to the intrinsic health that exists in our collective society and universe? Can we orient to this health while experiencing the individual and collective dysfunction and chaos within our society? Can we be still, and come into relationship with what is showing up in the moment and ride the wave? Between the poles of love and fear, stillness and chaos, Spirit and form - Shift is Happening.

Sound Healer – Amahla Johnson Intuitive sound healer, Amahla Johnson, will use her voice to work on the conference group as one body. In a short presentation after the keynote, she will explain her way of working with sound, and then move into energetically enquiring what shift is required to support participants with heart-centered collaboration and dialogue.
