This workshop is a hands-on introduction to the therapeutic principles of craniosacral biodynamics for interested craniosacral practitioners new to the concept. It will focus on the nature of the empathetic holding field, the relationship of Source, being and self, the perception of primary respiration as a universal ordering force, the nature of the ‘inherent treatment plan,’ and the natural unfolding of healing processes as an effect of the ‘potency,’ or life force, present within the fluids of the body and as field phenomenon generated by the action of primary respiration. Within this context, Sills will follow the needs of the group as they unfold over the seminar.

This is a rare opportunity to study with Sills one of the innovators in the field, and will be of interest to all clinicians with a good grounding in craniosacral work. Class space is limited. Early application and registration is recommended.
